

## KORE CHAIR MOVEMENT FOR STUDENT IMPROVEMENT

Thank you so much for the Vision Grant. My goal was to increase student achievement by using the 6 Kore Chairs that I purchased using the money that was graciously given. They are research based tools to help with Sensory Integration. My students are able to focus for longer periods of time and increase performance in the resource classroom. The majority of my students have ADHD, and the Kore chairs really help them in the classroom. As we say in class, "We can wiggle while we work!". My students have done so well following the rules of use. They can move about without distracting themselves or others. Again, thank you so much for your support, it is greatly appreciated!
