

I would like to thank the Foundation for granting my 2019-2020 vision grant for Classroom Calculator Connections. I was able to purchase 4 TI-84 plus CE graphing calculators and also one TI-83 plus calculator. My students enjoyed having the newer model calculators to use in class. I also let them check out the calculators to do their homework. It makes a big difference in my class to be able to graph in color on the CE models as well. Students who could not afford their own calculator also liked being able to use these in class because they were exactly like the ones their friends had. All of my receipts are at school but I am attaching a picture of my order history from eBay, where I was able to find the best price. My students used the calculators every day in class this year and some have checked them out throughout the pandemic.

I will hopefully continue to add a few calculators every year to my collection. Thank you again for your support.
