

I appreciate your generous donation to my class. As this has been a challenging year, I have been establishing the maker space in my class by using the grant funds to:

Repair the nozzle on our Affinity 3D Printer

I have purchased 2 additional 3D printer

Filament for both 3D printers

Yahboom Micro:bit V2 V1.5 Smart Robot Kit Programmable STEM Education Car Super

(Without Micro:bit, Compatible with Micro:bit V2)

Several puzzles (2d and 3d for problem solving)

Various craft supplies

I have \$103.90 remaining because 3 of the yahboom robotic kits weren't available. They are in the process of being reordered from another supplier.

Respectfully Submitted,

Kayla Eskew
