

Since purchasing our bird feeders with the grant money last year our students have flourished in their knowledge of wildlife and love watching the birds. The students have taken the lead on filling the bird feeders and water trays as needed, which gives them a sense of independence and responsibility. They have learned to identify the local varieties of birds that frequent our feeders. They have so much fun finding the different types of birds and sharing their knowledge with each other. It has brought a lot of enjoyment to our kindergarten classes as a whole, since every class can see the feeders and watch the birds. The feeders that we were able to purchase are very sturdy and will be able to serve us for years to come and provide enjoyment to countless students.

Thank you,  
Amy Wilhelm  
Kindergarten Teacher  
W.E.Parker Elementary
