

**Vision Grant Summary :**  
**Genius Hour**

Genius Hour has been an exciting project to include in my classroom. Students are learning everything from crocheting to origami to chess. I am really looking forward to next year as the opportunity continues. I have been able to reflect on how to execute the activities in my classroom and the amount of time needed. This is definitely a classroom endeavor the kids will enjoy for years to come. Next year, I plan on adding more time to Genius Hour for the students and even work to build on the library of enriching activities this grant has so graciously afforded our classroom.
