

## Where in the World Did That Happen?

Thank you so much for the opportunity to receive a grant for the 21-22 school year. My grant was for maps to use in my social studies classes. After the grant was written, I was moved to a different position but the maps were purchased to use in a sixth grade social studies classroom and have greatly enhanced the knowledge of just where in the world places that they are learning about are located and how the location and geography of each area influenced the cultures that developed in those areas. This knowledge will really help them as they move into 7th grade, which now focuses on world geography.

Again, thank you for all that you do to help the students of Edgefield county. It truly takes a village to raise a child.
