

I received a Vision Grant at the end of the 2020-2021 school year. I won the grant for our Special Education department to purchase document cameras. Our department has found these document cameras to be very beneficial to our instruction. Modeling for students has drastically changed, which impacts the way our students learn. With the document cameras, we can show what we are doing on our papers on the board. The students are able to watch us step by step perform problems or watch step by step how to organize their thoughts to write a paper. The possibilities of things to model with these cameras are endless. The document cameras provide instant examples in an authentic matter.

Thank you so much for providing this great tool to enhance our students' learning.

Best Wishes,

Whitney B. Martin
