

Last year I purchased and this year I implemented new flexible seating with my first grade students. Throughout the years I have only had some flexible seating for students to use, but this year every student in my class was able to have a voice and choice about the seating they were able to use. This type of seating allowed students to wiggle and move as they worked. It made for a comfortable and relaxing classroom environment. Students also were able to change seating throughout the year. If a student noticed that seating choice was not the best fit for them and it was not allowing them to focus, they made a plan to change seats and try something new. Thank you so much for supporting my students and making their learning environment a safe and enjoyable place to come to each and every day!
