

Foundation for Public Schools in Edgefield County
P.O. Box 28
Edgefield, SC 29824

Dear: Foundation,

Thank you again for sponsoring my class project. My students enjoyed building a structure that will be used by other students for years to come. For some of my students this was their first time working with power tools, and It's because of you that I was able to give them that experience. We started with measuring the garden box and cutting the wood to fit the box frame.

Then we secured the frame with screws, and added a hinge for easy opening and closing.

PVC frame was next and finally the plastic cover.

We had some hiccups along the way but It was a great learning experience. We planted squash in the garden box and my 7th grade students are investigating the best method to keep bugs away from squash and okra plants. My plan is to provide covers for all of the garden boxes, so you may see my name among the other teachers when applications go out for the next vision grant.

Sincerely,
Rewa Milton
