Hello,

I am very grateful to have received the Teacher's Vision Grant. This generous funding enabled me to purchase a light table and manipulatives that have transformed learning in my classroom.

The light table has created a versatile, curriculum-aligned learning environment that nurtures students' natural curiosity while supporting their developmental needs. Students enthusiastically engage with the resource across multiple subject areas: they use the illuminated surface and tiles for phonics exploration, letter recognition, and sound development, while the math manipulatives support foundational concepts in addition and subtraction.

This tool has proven invaluable for fostering student engagement, peer collaboration, and a genuine love of learning. I am grateful for this opportunity to enhance my students' educational experience.

Thank you,
Kristen Womack
