

Thank you so much for supporting my classroom. My students have enjoyed having new flexible seating options in our classroom this year as well as new clipboards. These materials have made it possible for students to comfortably work around the room. The testing dividers have also allowed students to have personal space and privacy while testing which has been very nice. We have also really enjoyed the small group games which they have also used during center time as well! We love and appreciate your support every year in our classrooms.
