

Attention: Edgefield School Foundation

I am more than grateful to be awarded the Vision Grant for classroom supplies for the 25-26 school year. It was fun creating challenges for my students to work through with the drones. They navigated a simple obstacle course and used the drones in a simulated rescue mission. This led to many conversations about how drones are used today and what our future might look like as technology advances in this area. I am already planning more lessons with other classes. Thank you again for the opportunity to bring another form of engagement to my students.

Sincerely,  
Mrs. Milton
