

Savannah McKinley - Vision Grant Summary
Inspiring Creativity and Community through High Quality Photo Printing

Dear Edgefield School Foundation,

Thank you so much for your support of educators in Edgefield County. With my Vision Grant, I was able to purchase a high quality photo printer for our school. We have not been able to use it much this school year, as the setup and rollout took a while, but we have many plans to use it in the future, beginning with Awards day and celebrations at the end of this school year, and in many initiatives next school year. I anticipate the printer enhancing and impacting our school community in meaningful ways. Students will be able to see their achievements celebrated through professionally printed photos, hang creative projects and artwork, and enhance our school's ability to document and share community events. Your investment in this technology and our school shows a commitment to celebrating school success and enriching our school culture.

Thank you again for your contribution,
Savannah McKinley
