

STEM Bins

Shannon Petty
Douglas Elementary

Our Media Center has been transformed into a hub of innovation thanks to our new hands-on learning bins! These kits were assembled to give our young learners the tools they need to explore, build, and problem-solve at their own pace. By providing interactive activities that spark curiosity, we are not just teaching facts—we are cultivating the next generation of critical thinkers. These materials allow every student to engage deeply through the power of active discovery.
